

Havoline®

*Havoline engine oils;
designed to pro-actively
protect your engine*

Keep going with Texaco® Havoline.

Keep going with Texaco® Havoline.

Keep going with Texaco® Havoline® engine oils

Responding to the extreme demands of your engine, Havoline engine oils deliver dynamic protection and performance where it is needed most, exceeding many of the toughest industry specifications.

Contents

Havoline ProDS™

Premium performance engine oil – pro-active protection for latest generation vehicles

Havoline Ultra

High performance protection for modern vehicles

Havoline Energy

Proven performance protection for modern vehicles

Havoline Extra

High wear protection for older high-mileage vehicles

Four-stroke & two-stroke engine oils

Automatic transmission fluids

Gear oils

Antifreeze/Coolants

Brake fluids

Greases

Havoline ProDS engine oils with Deposit Shield Technology pro-actively protect the latest generation of vehicles fitted with low emission, fuel efficient engines.

Manufactured using high quality premium synthetic base oils and specifically designed additives, Havoline ProDS engine oils pro-actively help shield your engine from damaging deposits and wear by constantly renewing the Deposit Shield protective barrier which keeps harmful deposits from forming on your engine's critical surfaces, while reducing wear.

Havoline ProDS SAE 0W-20

API SP with Resource Conserving fuel efficient synthetic engine oil; designed to protect the latest exhaust aftertreatment systems

Product highlights:

- Mid SAPS formulation to help protect exhaust aftertreatment systems
- Offers improved fuel economy
- Designed to reduce exhaust emissions
- Good low temperature fluidity aids cold start protection
- Advanced keep clean performance

Havoline ProDS BM SAE 5W-30

Fuel efficient engine oil designed for improved oxidation stability and extended drain intervals in engines requiring Mercedes-Benz 229.52 or BMW Longlife-04

Product highlights:

- Offers extended DPF and TWC service life
- Promotes engine protection
- Formulated to help protect engine at cold start-up
- Aids reduced deposit and sludge formation
- Helps minimise oil consumption
- Meets demanding MB 229.52 oxidation stability and fuel economy requirements

Havoline ProDS F SAE 0W-30

Fuel efficient engine oil recommended for the latest generation Ford engines requiring Ford WSS-M2C950-A or Jaguar Land Rover STJLR.03.5007

Product highlights:

- Designed for improved fuel economy
- Offers longlife engine and emission system protection
- Helps protect catalysts and diesel particulate filter systems
- Low temperature engine protection
- Promotes extended engine life

Havoline ProDS F SAE 5W-20

Fuel efficient engine oil designed for use in direct injected turbocharged Ecoboost engines meeting Ford WSS-M2C948-B or Jaguar Land Rover STJLR.03.5004

Product highlights:

- Designed for improved fuel economy
- Offers longlife engine and emission system protection
- Helps protect three-way catalysts
- Low temperature engine protection
- Promotes extended engine life

Havoline ProDS M SAE 5W-30

Fuel efficient engine oil designed for improved oxidation stability and extended drain intervals in engines requiring Mercedes-Benz 229.52 or Opel/Vauxhall OV 040 1547-D30

Product highlights:

- Offers extended DPF and TWC service life
- Promotes engine protection
- Formulated for protection at cold engine start
- Aids reduced deposit and sludge formation
- Helps minimise oil consumption
- Meets demanding Mercedes-Benz 229.52 oxidation stability and fuel economy requirements

Havoline ProDS MG SAE 0W-20

Synthetic engine oil designed to deliver the latest fuel economy and low emission output requirements for a wide range of vehicles

Product highlights:

- Formulated to maintain low emissions and fuel-efficient performance
- Advanced mid SAPS, low viscosity design
- Promotes catalyst, GPF and DPF service life
- Designed for high temperature keep-clean engine protection
- Helps prevent low speed pre-ignition
- Latest industry tests show good super knock prevention

Havoline ProDS P SAE 0W-30

PSA B71 2312 engine oil designed for extended drain and emission system protection; recommended for vehicles manufactured by Peugeot and Citroën

Product highlights:

- Designed for extended drain engine and emission system protection
- Mid SAPS formulation
- Aids rapid oil circulation at cold starts
- Helps minimise deposits and sludge
- Offers thermal stability, with low volatility and oxidation
- PSA tests prove no contribution to LSPI

Havoline ProDS PR SAE 5W-30

PSA B71 2290 engine oil designed for advanced protection of GPF/DPF systems; recommended for vehicles manufactured by Peugeot and Citroën

Product highlights:

- Designed for engine and emission system protection
- Offers protection to catalysts and particulate filters
- Helps minimise deposits and sludge
- Promotes engine fuel efficiency performance
- Offers reduced oil consumption
- PSA tests prove no contribution to LSPI

Havoline ProDS RN SAE 0W-20

RN17FE approved fuel efficient synthetic engine oil; recommended for use in vehicles manufactured by Renault with the latest aftertreatment systems

Product highlights:

- Approved against Renault RN17FE
- Offers reduced fuel consumption
- Helps minimise emissions
- Formulated for oxidation stability
- Designed for wear and corrosion protection
- Low temperature engine start protection

Havoline ProDS RN SAE 5W-30

RN17 approved engine oil; recommended for use in modern vehicles manufactured by Renault

Product highlights:

- Approved against Renault RN17
- Offers protection to catalysts, GPFs and DPFs
- Formulated for reliable oxidation stability
- Helps protect engine components from deposits
- Developed to maintain fuel efficiency
- Aids wear and corrosion protection

Havoline ProDS V SAE 0W-30

Extended drain engine oil specifically designed to meet VW Standard 507 00, 504 00 & Porsche C30; recommended for a wide range of VW/Audi engines

Product highlights:

- Suitable for a wide range of Volkswagen/Audi vehicles
- Promotes engine wear protection and performance
- Promotes TWC and DPF protection
- Helps protect at engine cold start-ups
- Offers deposit and sludge resistance
- Designed for long, low volatility oil service life

Havoline ProDS V SAE 5W-30

Extended drain engine oil specifically designed to meet BMW Longlife-04, Mercedes-Benz 229.51/229.31, Porsche C30 and VW Standard 507 00 & 504 00 requirements

Product highlights:

- Offers extended DPF and TWC service life
- Promotes engine protection
- Formulated for protection at cold engine start
- Aids reduced deposit and sludge formation
- Helps minimise oil consumption

Havoline ProDS VB SAE 0W-20

Fuel efficient synthetic engine oil specifically designed to meet VW Standard 509 00 & 508 00 and low emission requirements in VW/Audi engines

Product highlights:

- For new VW/Audi & Škoda low emission, fuel efficient engines
- Offers improved vehicle fuel consumption
- Promotes low emission output
- Formulated to help optimise engine service life
- Designed to protect against engine wear
- Aids cold temperature start-up

Havoline® Ultra

Havoline Ultra engine oils with Deposit Shield Technology offer high performance protection for modern vehicles fitted with low emission engines.

Manufactured using a combination of high quality premium synthetic base oils and additive technology, Havoline Ultra engine oils are designed to shield your engine from damaging deposits and wear, helping to protect the engine as well as catalytic converters and diesel particulate filters (DPFs)⁽¹⁾ (where fitted).

Havoline Ultra SAE 0W-30

A3/B4 synthetic engine oil offering robust engine protection in low temperatures and severe conditions

Product highlights:

- Helps extend engine life in severe conditions
- Offers extended oil drain periods
- Designed for reliable low-viscosity wear protection
- Formulated for improved fuel economy
- Aids rapid engine protection during cold start-ups

Havoline Ultra SAE 5W-40

A3/B4 synthetic engine oil designed for the performance of modern vehicles

Product highlights:

- Helps extend engine life in severe conditions
- Offers extended drain periods and reduced maintenance
- Formulated for optimum viscosity control
- Designed for wear resistance
- Promotes low temperature start-up protection

Havoline Ultra R SAE 5W-30

C4 low SAPS engine oil meeting Renault RN0720; designed to extend engine life in severe driving conditions

Product highlights:

- Designed to extend engine life in severe conditions
- Low SAPS helps protect TWCs and DPFs
- Offers good TBN retention and viscosity increase control
- Formulated for reliable engine wear protection
- Aids cold engine start protection

Havoline Ultra S SAE 5W-40

C3 engine oil designed for extended engine life in rigorous driving conditions; recommended for use in Mercedes-Benz and Renault diesel engines, or engines requiring GM dexos2

Product highlights:

- Designed for extended engine life in rigorous driving conditions
- Offers extended oil drain intervals
- Promotes TWC and DPF protection
- Formulated for reliable engine wear resistance
- Aids cold engine start protection

Havoline® Energy

Havoline Energy engine oils with Deposit Shield Technology offer proven performance protection for modern vehicles fitted with low emission, fuel efficient engines.

Manufactured using a combination of high quality premium base oils and additives, Havoline Energy engine oils are designed to protect your engine's overall performance and shield your engine from damaging deposits and wear, to help maximise fuel economy⁽²⁾.

Havoline Energy SAE 0W-30

Volvo VCC 95200377 approved engine oil designed for improved fuel economy in a wide range of Volvo vehicles, especially in adverse conditions

Product highlights:

- Designed for improved fuel economy
- Helps minimise deposits and sludge
- Offers viscosity increase control
- Aids cold start protection even with biodiesel fuels

Havoline Energy SAE 5W-30

Low friction, extended drain A5/B5 engine oil designed to meet Ford WSS-M2C913-D and Renault RN0700

Product highlights:

- Promotes improved fuel economy
- Formulated to resist harmful deposits and sludge
- Designed for wear and corrosion resistance
- Offers low temperature cold start protection

Havoline Energy EF SAE 5W-30

C1 fuel efficient engine oil meeting Jaguar Land Rover STJLR.03.5005 requirements

Product highlights:

- Designed for enhanced fuel economy
- Promotes engine wear protection
- Helps minimise deposit and sludge build-up
- Aids cold engine start protection

Havoline Energy MS SAE 5W-30

C2 fuel efficient engine oil

Product highlights:

- Designed for fuel efficiency
- Offers TWC and DPF compatibility
- Helps extend engine life
- Promotes improved oil consumption

⁽¹⁾ Please note: Havoline Ultra SAE 5W-40 is designed to protect your engine but not DPF

⁽²⁾ Fuel Economy performance is dependent upon vehicle/engine type, outside temperature, driving conditions, driving style, engine oil viscosity and manufacturer service recommendations

Havoline® Extra

Havoline Extra engine oils have been developed using high quality base oils and additives to provide the level of high wear protection required by older high-mileage vehicles which are not fitted with catalysts or diesel particulate filters.

Havoline Extra SAE 10W-40

High ash, high TBN semi-synthetic A3/B4, SN engine oil offering year-round performance for high temperature driving in older high-mileage vehicles

Product highlights:

- Extended drain formulation
- Cold start and high temperature protection
- Designed to provide year-round engine performance
- Helps offer keep-clean engine protection
- Designed for high temperature driving

Havoline Extra SAE 15W-40

High ash semi-synthetic A3/B4, SN engine oil designed to provide engine protection for year-round highway and stop-start city driving, and for older vehicles

Product highlights:

- Helps improve vehicle up-time
- Offers wide temperature protection
- Formulated to minimise deposit build-up
- Provides wear and corrosion resistance
- Designed for highway and stop-start city driving

Four-stroke & two-stroke engine oils

Havoline 4T Motorcycle Oil SAE 10W-40

JASO MA2 four-stroke motorcycle oil designed for use in high performance air- and liquid-cooled engines operating under a wide variety of conditions, from mild to severe

Product highlights:

- Offers good engine/transmission keep-clean performance
- Helps reduce wear in highly stressed engines and gearboxes
- Designed for optimum power release and smooth clutch operation
- Formulated for cold start-up and high temperature protection

Havoline Super 2T-X

Part-synthetic two-stroke engine oil for use in air-cooled engines; recommended for motorcycles, snowmobiles and chainsaws operating in mild conditions

Product highlights:

- Helps reduce spark plug fouling and early replacement
- Provides reliable engine protection
- Offers resistance to ring sticking and pre-ignition
- Aids emission reduction

Automatic transmission fluids

Havoline DCT Fluid

Dual clutch transmission fluid designed for vehicles fitted with wet-clutch transmissions, specifically designed for Audi/VW/Škoda/Seat DQ250 & DQ500 and BMW Getrag 7DCI600 & DCI700

Product highlights:

- Offers protection against wear
- Formulated to protect against pitting and scuffing
- Designed for shudder-free operation
- Promotes copper corrosion protection
- Offers high viscosity index and shear stability

Havoline Full Synthetic Multi-Vehicle ATF

Synthetic multi-vehicle automatic transmission fluid for systems with six or more forward gears; GM Dexron VI approved and recommended for use in a wide range of modern vehicles, even when operating under extreme conditions

Product highlights:

- Can be used in a wide range of modern automatic transmissions
- Offers smooth, consistent gear shifting and shudder control
- Wide temperature operation
- Advanced formula helps protect gears and bearings
- Formulated for extended drain intervals
- Designed for enhanced fuel economy

Havoline Multi-Vehicle ATF

Multi-purpose automatic transmission fluid recommended for use in a wide range of vehicles from European, Japanese and North American manufacturers

Product highlights:

- Protection against gear, bearing and clutch wear
- Sludge, lacquer and harmful deposit resistance
- Long fluid service life
- Smooth shifting, efficient power transfer and anti-shudder protection
- Rapid circulation in cold weather start-up
- Transmission fluid cooler protection

Texamatic 7045E

Automatic transmission fluid

Product highlights:

- Suitable for passenger cars, light trucks and buses
- Designed to resist wear, corrosion and oxidation
- Helps protect transmission fluid coolers
- Formulated for cold start equipment protection

Gear oils

Gear Oil GL-5 SAE 80W-90, 85W-140
Automotive gear lubricants for manual transmissions that require an API GL-5 fluid

Product highlights:

- Proven performance EP wear resistance
- Robust cold start protection
- Highly shear stable

Geartex LS SAE 85W-90
Automotive gear lubricant formulated for use in limited slip differentials that require an API GL-5 fluid

Product highlights:

- Promotes smooth, noise free operation
- Aids protection against component scuffing and wear
- Designed to offer component wear protection during cold starts
- Contributes to protection throughout fluid lifetime

Geartex S4
Synthetic multigrade automotive gear lubricant for manual transmissions that require an API GL-4 fluid

Product highlights:

- Effective additive technology promotes EP and anti-wear performance
- Low temperature fluidity and system protection
- Reliable oxidation stability
- Contributes to rust and corrosion protection of ferrous and yellow metals
- Compatible with a wide range of seals

Antifreeze/Coolants

EGX Antifreeze/Coolant Concentrate, Premixed 50/50

OAT-based coolant, designed to provide year-round frost, corrosion and boil protection in cars, vans and heavy-duty applications

Product highlights:

- Advanced heat transfer performance
- Longlife OAT-backed performance
- Good high temperature oxidation and pH stability
- Neutralisation package helps prevent gels or deposits

Brake fluids

Brake Fluid DOT 4
Non-petroleum automotive brake fluid for use in conventional hydraulic brakes and clutch systems where DOT 4 fluids are recommended

Greases

Copper Grease 9143
Water resistant anti-seize copper powder grease designed to prevent seizing of metal connections under high pressure and lubrication of sliding surfaces

Starplex EP 2
Multi-purpose lithium complex grease

Molytex EP 2
Multi-purpose heavy duty EP lithium grease containing Molybdenum Disulphide (MoS₂)

Multifak EP 2
Extreme pressure multi-purpose lithium grease; operating temperature -30°C up to +120°C

Approvals & Performance table.
